BESTOLIFE® 2000® NM, the non metallic alternative to API Modified, conforms to API RP 5A3. Ideal for running and storing casing, tubing, and line pipe, 2000® NM provides high temperature performance, is inert to chemical attack, and protects against corrosion.

APPLICATIONS

Premium non metallic alternative to API for casing, tubing, and line pipe.

TECHNICAL DATA

BESTOLIFE® 2000® NM meets or exceeds the listed performance objectives in API RP 5A3 as well as the requirements of API Specification 5CT. It also addresses one of the major concerns in pipe yards and threading operations today: rejects due to pitting and corrosion. In a 700-hour salt fog spray test, the base grease and additive package utilized in BESTOLIFE® 2000® NM has demonstrated corrosion protection that exceeds the performance of the leading storage compound in the industry. The results of these tests show that BESTOLIFE® 2000® NM is not only an excellent "running" compound but can also provide superior protection during long-term storage.
