

# CAL COOL<sup>®</sup> 2565

## SYNTHETIC COOLANT

CAL COOL 2565 is an oil free, biodegradable, synthetic coolant for machining, grinding and roll forming. It is compatible with all ferrous and non-ferrous metals and can be used in all types of grinding operations and general machining jobs such as turning, milling, drilling, boring, reaming and sawing.

CAL COOL 2565 contains synthetic rust inhibitors, anti-weld additives, wetting agents, and biological control agents. Contains no chlorine or sulfur. CAL COOL 2565 solutions are clear and very low foaming.

## TYPICAL PROPERTIES

Appearance:	Clear, yellow liquid
Specific Gravity (68°F):	1.054
Density:	8.78 lbs / gal
pH:	9.25 (10%)
